

greening hotels & resorts

Cádiz Design Studio is committed to principles of sustainability by taking a leadership role in solving the environmental challenges that are relevant to the hospitality industry. Our consulting services emphasize the principals of Green Building, Corporate Sustainability, Renewable Energy, and Education.

The hospitality industry has become increasingly aware of the environmental impact of their business. As a result, hotels and resorts around the world have demanded new practices and procedures that incorporate the principles of sustainability. The financial and social benefits of going green is on the rise, including:

- Reducing Energy Use and Operational Costs
- Increasing Guest Satisfaction
- Cutting Edge Technology
- Community Involvement

Cádiz Design Studio is an architecture and interior design firm that works with major hotel brands and boutique hotels to explore, develop and implement a range of environmental initiatives. We work together with owners to develop customized strategies based on hotel location, business models, clientele and unique opportunities to make sustainability profitable.

Cádiz + Green

Few sectors have experienced the tremendous growth in sustainable initiatives as the hotel and resort industry. The team at **Cádiz Design Studio** will help you explore and implement cost-effective solutions that are customized for you, your staff and guests.

A brief overview of how we can help you save money and enhance the experience of your guests:
